COURSE SUMMARY

CAL POLY
SAN LUIS OBISPO

DEPARTMENT: IME

TERM: Spring 2024

RESPONSES: 30 OUT OF 33 - 90.91%

INSTRUCTOR: Apiado, Katrina

COURSE: IME-312 02 Data Mgmt and System Design

QUESTIONAIRE: ENGR238ALL

QUESTION GROUP STATISTICS

INDICATOR	AVERAGE	MEDIAN	S.DEV
Instructor Evaluation (1.1 - 1.4)	4.38	4	0.65
Summary Evaluation Average (2.1 & 2.2)	4.52	5	0.62

INSTRUCTOR EVALUATION

NUM	QUESTION	AVERAGE	MEDIAN	S.DEV	N =	(5)	(4)	(3)	(2)	(1)
1.1)	The instructor was organized and prepared for class.	4.33	4	0.61	30	12	16	2	0	0
1.2)	The instructor created a learning environment where I felt valued and respected.	4.67	5	0.48	30	20	10	0	0	0
1.3)	The instructor was helpful during office hours.	4.14	4	0.83	22	9	7	6	0	0
1.4)	The instructor responded to questions in a clear and relevant manner.	4.3	4	0.6	30	11	17	2	0	0

SUMMARY EVALUATION

NUM	QUESTION	AVERAGE	MEDIAN	S.DEV	N =	(5)	(4)	(3)	(2)	(1)
2.1)	Overall, this instructor was educationally effective.	4.43	4.5	0.68	30	15	14	0	1	0
2.2)	Overall, this course was educationally effective.	4.6	5	0.56	30	19	10	1	0	0

COMMENTS

1.5) Please provide some specific examples of what you found to be educationally effective or ineffective during this course (e.g., organization, helpfulness, overall teaching ability, assessments.)

- a very enjoyable teacher

- Great lab lecturer! I wish her the best in her post grad as she finishes grad school! Was really helpful and understanding throughout the quarter and was quick to answer questions and was understanding when problems were high.

- Katrina was very helpful in helping me learn sql. Since learning all the necessary syntax, every lab, I've felt confident in my ability to query databases. For the future, It would be nice to build more databases. Although we may not be making databases in the real world too often, it would be helpful to be versed in overcoming foreign key constraints and other problems which may arise while creating a database.

- W Grad student professor, had some trouble at the beginning but then really popped off over time. Well versed in SQL and did not feel lost in the class. Very helpful when asking questions.

- the examples and walking us through problems

- Labs could have been more rigorous and more on developing stronger SQL and database design skills. We often got out within an hour, which I will not complain about in any way, but it shows that the content was pretty elementary and it would have been cool to learn more advanced and applicable skills through the lab.

- Katrina provided examples before the start of the lab that were very helpful in learning the material. Giving us hints without giving us the answers made me a more well-rounded coder in SQL.

- She is also a student and explained concepts from a fresh perspective of never working with the material before which made it easy to learn and understand.

- Having a demo before each SQL workshop was great so we could know the kind of problems we would see in the actual assignment instead of going in blind. Having the free work periods were great to either work on our project or the SQL assignment for the week.

- Katrina makes accommodations for students and is very helpful when confused about how to structure queries. She has a good grasp of the content and provides useful resources to further learning

- Katrina made it clear that she was here to help us and to utilize her knowledge to the full extent. She provided a fun and engaging environment. I will miss having her as my instructor.

- Apiado was very helpful whenever I asked questions about her assignments. Also, I wasn't intimidated to ask her questions and she made the labs fun to be in.

- They would not directly give us the answer and lead us to discovering how to fix our problems with good guidance.

- live lab demos are helpful

- We all learned together throughout the lab portion. Katrina help with all questions and ensured we understood the material.

- Great!

- She was the best!!!

- great demos, very helpful

- Her SQL knowledge was very helpful when I ran into any issues.

- The professor gave examples and walked us through how to do it.
